PROFILE SUMMARY

Full-Stack Web Developer (MERN) with hands-on experience building and deploying production-grade applications, including secure authentication, cloud image storage, geolocation-based mapping, and AI-powered features built using LLM APIs. Skilled in designing RESTful APIs, integrating AI into real-world workflows, and debugging complex backend and deployment issues to ship responsive, end-to-end web applications. Seeking a Full-Stack Developer role to apply strong problem-solving skills and modern, AI-driven development practices in a production environment.

EDUCATION

Bachelor in Computer Application

Durgapur, West Bengal

Dr. B.C. Roy Academy of Professional Courses | MAKAUT • CGPA: 7.8 • 2023 – 2027

Class XII

Bokaro, Jharkhand

Wetge Public School | CBSE | 60% • Completed May 2023

Class X

Bokaro, Jharkhand

Carmel High School | JAC | 80.80% • Completed July 2021

EXPERIENCE

AICT — Full Stack Web Development Intern (MERN Stack)

June 2025 – Aug 2025

Durgapur, West Bengal

- Developed a full-stack property rental web application using the MERN stack (MongoDB, Express.js, React, Node.js).
- Independently diagnosed and resolved a critical database schema bug causing image URL upload failures, redesigning the MongoDB model to fix the issue end-to-end.
- Ensured cross-device and cross-browser compatibility by independently testing across 4-5 browsers/devices, improving UI reliability.
- Enhanced application functionality by integrating and consuming third-party and internal REST APIs.

PROJECTS

Wanderlust — AI-Powered Vacation Rental Platform (MERN)

[Live Demo →](#)

- Built and deployed a full-stack, Airbnb-inspired vacation rental platform (React, Node.js, Express, MongoDB) with full CRUD for property listings, live in production on Render.
- Engineered two AI-powered features using the Groq API (Llama 3.1) — an AI Trip Planner that recommends properties by budget, destination, and preferences, and an AI Description Generator for listings.
- Implemented secure authentication with Passport.js and email verification (Brevo SMTP), resolving production cross-origin cookie/proxy issues for reliable session handling at scale.
- Integrated Cloudinary and Mapbox for cloud image management and interactive location-based search, plus a reviews and ratings system to drive user engagement.

Personal Portfolio Website

[Visit Portfolio →](#)

- Designed and shipped a responsive personal portfolio to showcase projects and skills, used as a live branding asset for recruiter outreach and job applications.

ACHIEVEMENTS

Independently Designed, Developed, and Deployed a Production-Ready Full-Stack Application

Independently built and deployed Wanderlust, a full-stack MERN application, applying MVC architecture, RESTful API design, and secure authentication practices — demonstrating end-to-end ownership of backend (Node.js, Express.js, MongoDB) and frontend (React, Tailwind CSS) development.

Winner, Short Film Competition — BCRAPC Ignite 2025: Recognized for writing the story for the winning short film at the college's annual cultural fest, showcasing strong creative writing and storytelling skills.

TECHNICAL SKILLS

Languages: JavaScript, C, Java, Python, SQL

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Passport.js

Database: MongoDB, Mongoose

Tools & APIs: Git, GitHub, Cloudinary, Mapbox API, Postman

ADDITIONAL INFORMATION

Date of Birth: 06.05.2004 | **Languages Known:** Hindi, English, Bengali | **Hobbies:** Story Writing, Photography
